

Did you know that as an SA customer you have free access to Microsoft Official E-Learning?

Utilize the benefits of your Software Assurance agreement and increase staff productivity without breaking the budget. As a Microsoft SA customer, your license agreement includes Microsoft Official E-Learning benefits, however activating this useful training tool is both complicated and time consuming. As a result, most companies do not optimize their investment, and do not get their staff trained on new software releases, thus not improving productivity. Microworld Nova have developed Novacore which solves all the current time consuming tasks of rapidly deploying E-Learning to medium and large corporations, as well as offering useful reporting and analytical tools.

Microsoft Software Assurance for Volume Licensing

How Novacore Works

Deployment

We set up the users, assign courses and admin rights for you. We customize Novacore with your company logo and colors. We will send you a template of a welcomeing email with login information, to be send to your users.

Access

Each user receives an e-mail with information on how to access their e-learning. The profile is defined as either: Student, Reporter or Administrator.

Education

The user activates the e-learningen and follows the training. New courses can be added at any time.

Reports

HR or the IT Department use the reporting module to keep track of the usage of the e-learning and the users progress.

Novacore is a simpel and effective solution for

Deployment of Microsoft E-Learning

and for managing end user training.

What Novacore can do for your organization:

- Increase the productivity of employees •
- Save money on IT edudation budget

About Microsoft e-learning

Professional and user friendly education - available when you need it

Microsoft Official E-learning is designed to gain knowledge in the shortest time possible with accurate, relevant and engaging lessons in the Microsoft product suite - designed by Microsoft themselves. E-Learning is also an effective way to educate staff, either before or after the deployment of a new or updated software product. Furthermore e-Learning allow the users to receive training and study when and where it suits them the best. Microsoft E-Learning appeals to different forms of learning and educates the user from an audio-visual, engaging and educational way with the interactive choice as a hands-on simulations, exercises, etc.
