CompTIA Certified

CompTIA is an internationally-recognized association representing the technology community. CompTIA has developed specialized certification programs which assure employers of a candidate's basic technology skills.

We offer CertKits for each of the following CompTIA certifications.

All the CertKits include: E-learning, Exam simulation, Online Mentor, Tips & tricks.

CompTIA A+ is the foundation of your IT career and is the preferred qualifying credential for technical support and IT operational roles. It is about much more than PC repair.

- Candidates are better prepared to troubleshoot and problem solve.
- Technicians understand a wide variety of issues ranging from networking and operating systems to mobile devices and security.
- A+ supports the ability to connect users to the data they need to do their jobs regardless of the devices being used.

CertKits: CompTIA A+ (220-901) & CompTIA A+ (220-902)

CompTIA Advanced Security Practitioner (CASP) is the ideal certification for technical professionals who wish to remain immersed in technology as opposed to strictly managing. The CompTIA Advanced Security Practitioner certification validates:

- Advanced-level competency in risk management
- Enterprise security operations and architecture
- Research and collaboration
- Integration of enterprise security

CertKit: CompTIA CASP (CAS-003): Advanced Security Practitioner

CompTIA Cloud+ validates the skills you need to maintain and optimize cloud infrastructure services.
- It covers the increased diversity of knowledge, skills and abilities required of system administrators to validate what is necessary to perform effectively in data center jobs.
- CompTIA Cloud+ views cloud-based infrastructure services as an increasingly important piece of an organization's IT systems.
- It is the only vendor-neutral, performance-based certification covering more than a specific vendor to help you better realize the roi of cloud infrastructure services.

CertKit: CompTIA Cloud+ (CV0-002)

CompTIA CySA+ is for IT professionals looking to gain the following security analyst skills:
- Perform data analysis and interpret the results to identify vulnerabilities, threats and risks to an organization.
- Configure and use threat-detection tools.
- Secure and protect applications and systems within an organization.

CompTIA CySA+ meets the ISO 17024 standard and is approved by U.S. Department of Defense to fulfill Directive 8570.01-M requirements.

CertKit: CompTIA CySA+ (CS0-001): CompTIA Cybersecurity Analyst

CompTIA Linux+ covers multiple distributions, validating skills that help prevent platform lock-in and that promote more flexible approaches to Linux system troubleshooting. After passing the two exams, candidates will have mastered the following concepts:
- System configuration
- The command line interface
- Scripting basics
- Network settings and services
- System security

CertKits: CompTIA Linux+ 2014 (LX0-103) & CompTIA Linux+ 2014 (LX0-104)

Network+ ensures an IT professional has the knowledge and skills to:
- Design and implement functional networks
- Configure, manage, and maintain essential network devices
- Use devices such as switches and routers to segment network traffic and create resilient networks
- Identify benefits and drawbacks of existing network configurations
- Implement network security, standards, and protocols
- Troubleshoot network problems
- Support the creation of virtualized networks

CertKits: CompTIA Network+ (N10-007)

CompTIA Security+ is a global certification that validates the baseline skills you need to perform core security functions and pursue an IT security career.

It establishes the core knowledge required of any cybersecurity role and provides a springboard to intermediate-level cybersecurity jobs. Security+ incorporates best practices in hands-on trouble-shooting to ensure security professionals have practical security problem-solving skills. Cybersecurity professionals with Security+ know how to address security incidents – not just identify them.

CertKit: CompTIA Security+ (SY0-501)

CompTIA Server+ ensures pros have the skills to work in data centers or cloud environments.

CompTIA Server+ certification validates the skills necessary to be a server administrator. Successful candidates will have mastered the following concepts:
- Virtualization
- Storage
- Security
- Troubleshooting

CertKit: CompTIA Server+ (SK0-004)
