

NOVAcore

Your E-learning Management System

Did you know that as an SA customer you have

free access to Microsoft Official E-Learning?

Utilize the benefits of your Software Assurance agreement and increase staff productivity without breaking the budget. As a Microsoft SA customer, your license agreement includes Microsoft Official E-Learning benefits, however activating this useful training tool is both complicated and time consuming. As a result, most companies do not opti-

mize their investment, and do not get their staff trained on new software releases, thus not improving productivity. Microworld Nova have developed Novacore which solves all the current time consuming tasks of rapidly deploying E-Learning to medium and large corporations, as well as offering useful reporting and analytical tools.

How Novacore Works

Novacore is a simple and effective solution for

Deployment of Microsoft E-Learning

and for managing end user training.

What Novacore can do for your organization:

- Increase the productivity of employees
- Save money on IT education budget
- Deploy e-learning fast and easy
- Administrate users effectively
- Optimize your usage of SA benefits
- Access e-learning in 17 languages

E-Learning gets the most out of your software investment. Your employees will have access to strengthen their competencies. Thus accomplished more in less time, with the software tools the company has or will roll out. In addition to efficiency improvement, E-Learning helps in reducing time-consuming help desk calls and the need for classroom training.

About Microsoft e-learning

Professional and user friendly education - available when you need it

Microsoft Official E-learning is designed to gain knowledge in the shortest time possible with accurate, relevant and engaging lessons in the Microsoft product suite - designed by Microsoft themselves. E-Learning is also an effective way to educate staff, either before or after the deployment of a new or updated software product. Furthermore

e-Learning allow the users to receive training and study when and where it suits them the best. Microsoft E-Learning appeals to different forms of learning and educates the user from an audio-visual, engaging and educational way with the interactive choice as a hands-on simulations, exercises, etc.
